

ANALYTICS FOR HOSPITALS HEALTH-CARE WITH AN INTERACTIVE DASHBOARD

TEAM ID: PNT2022TMID27073

Analytics for Hospitals Healthcare | x

File | D:/New%20folder/index.HTML#

Data exploration

"Exploration to understand what is in a dataset and the characteristics of the data, rather than through traditional data management systems."

SPRINT 3

Dashboard creation

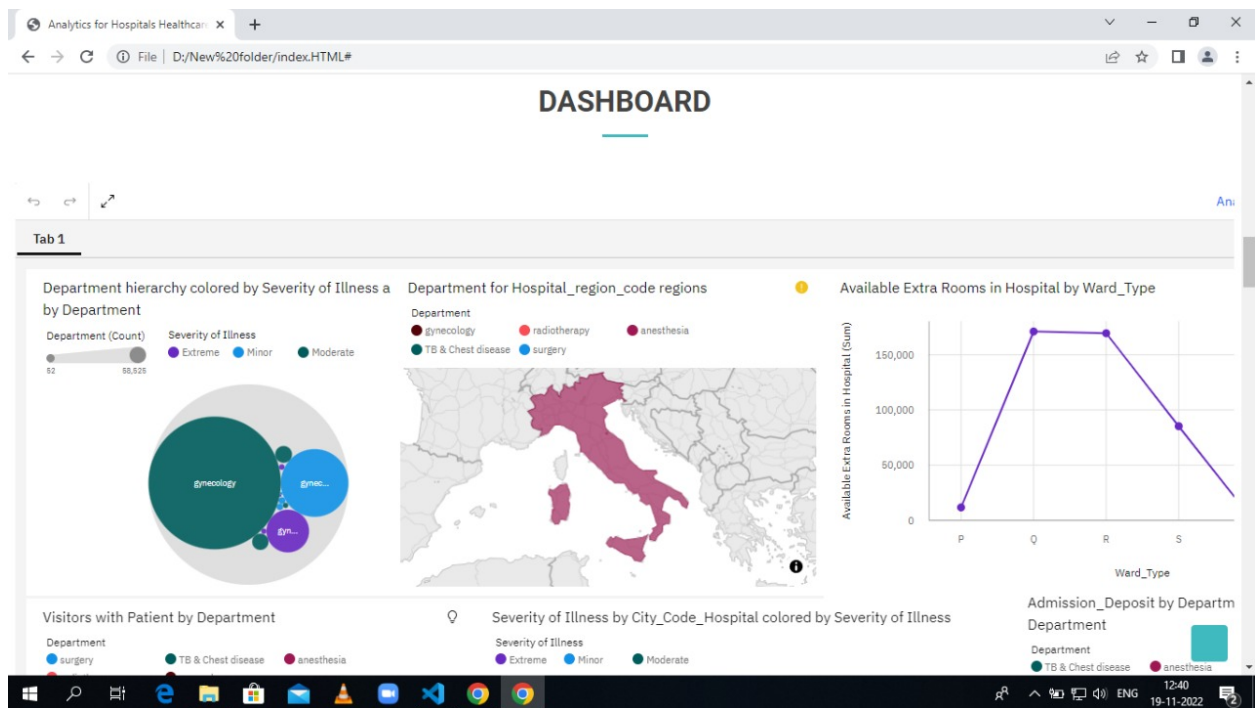

"A dashboard in healthcare is a business tool that hospitals and other healthcare providers use to keep track of patient information, dashboard performance indicators, other changes in healthcare regulations."

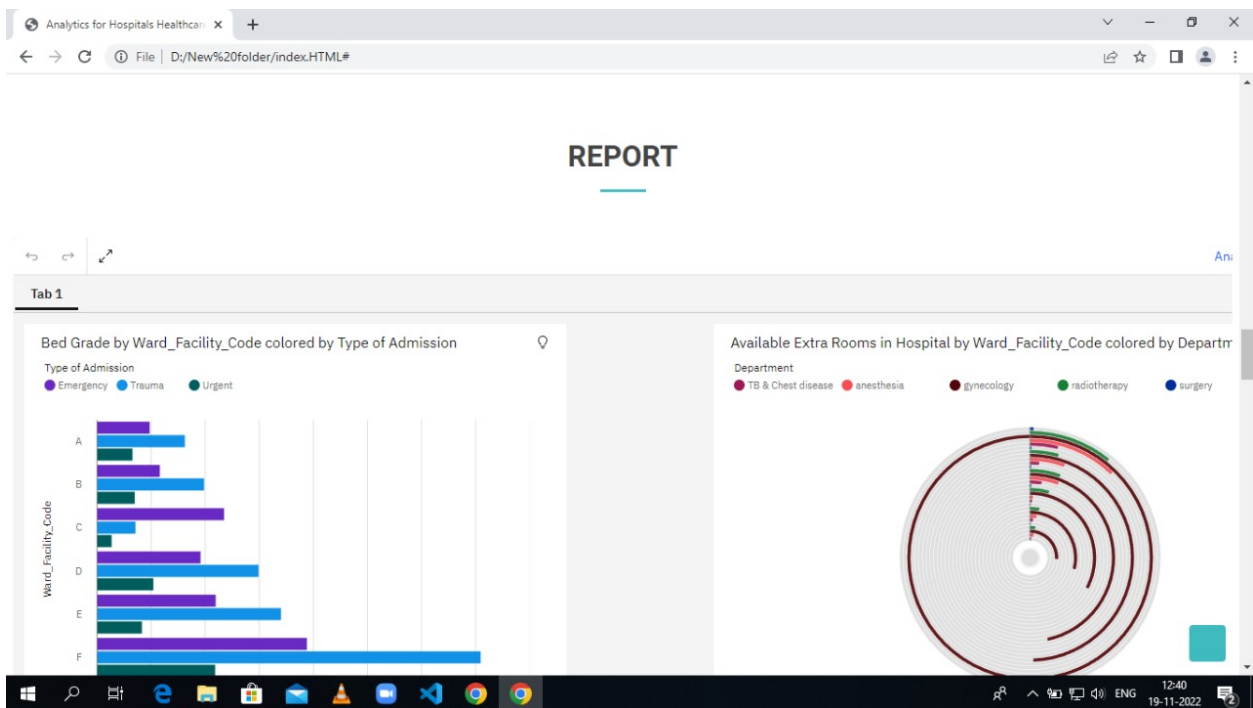

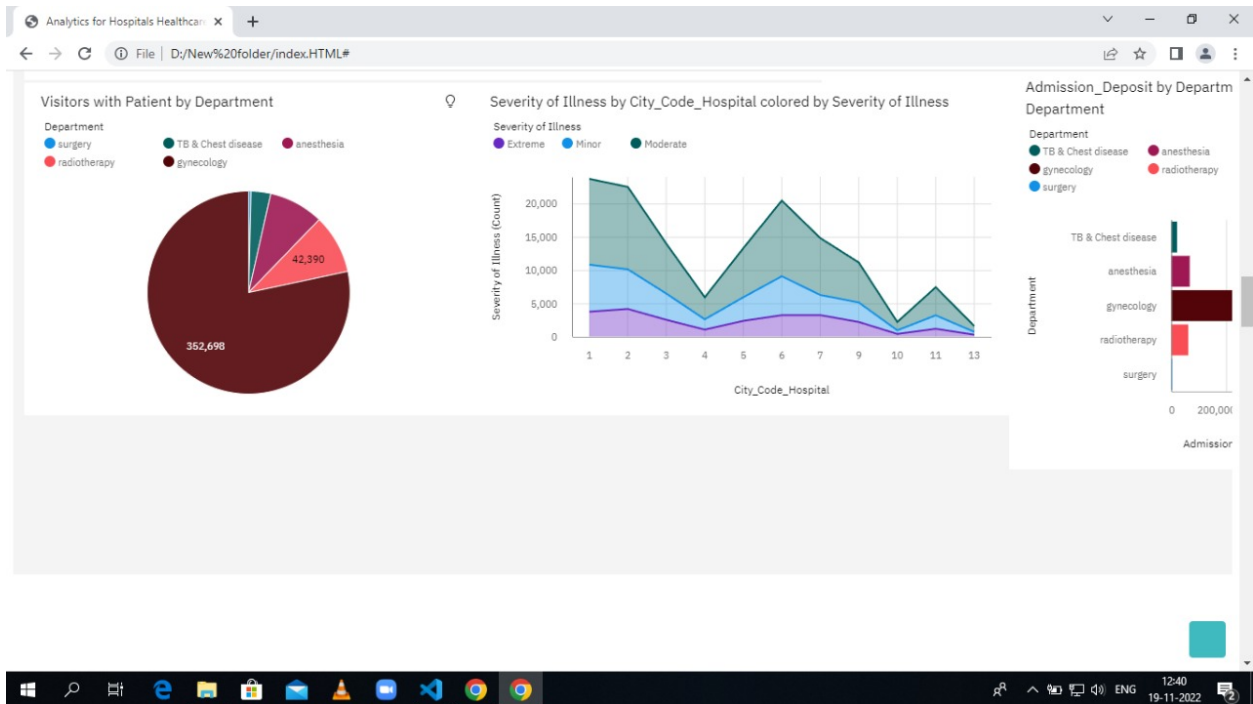

SPRINT 4

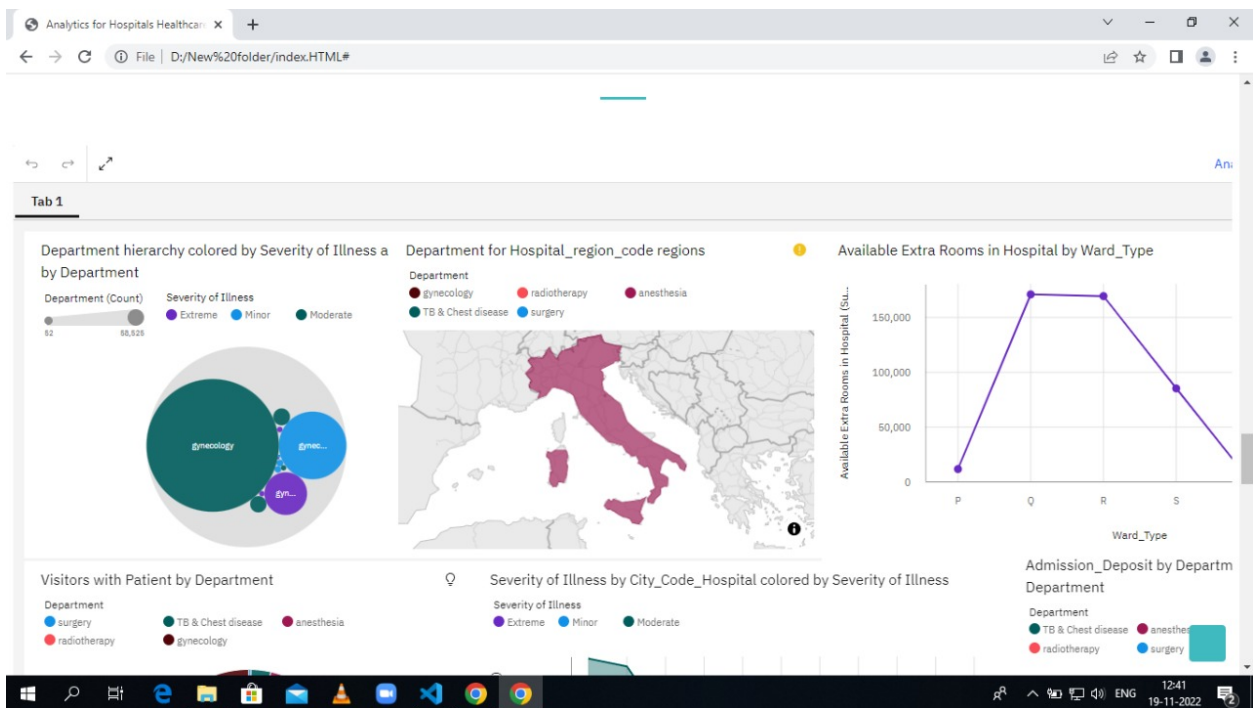

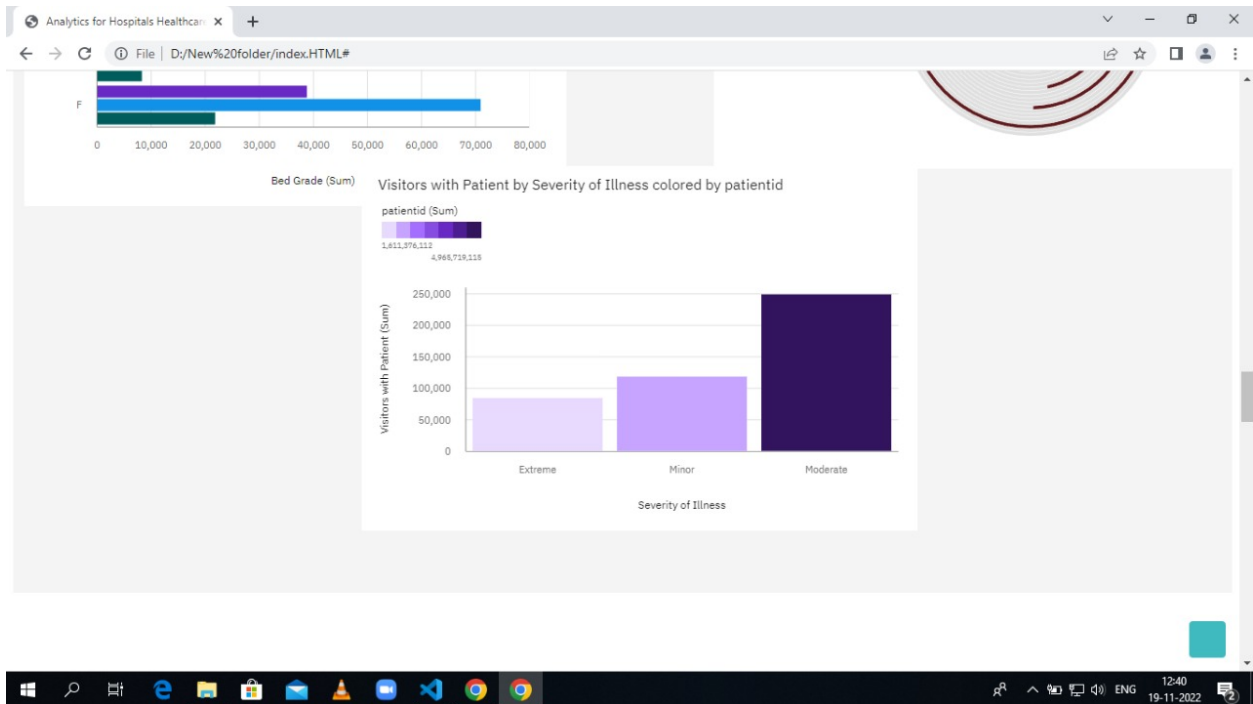

Report creation and story creation

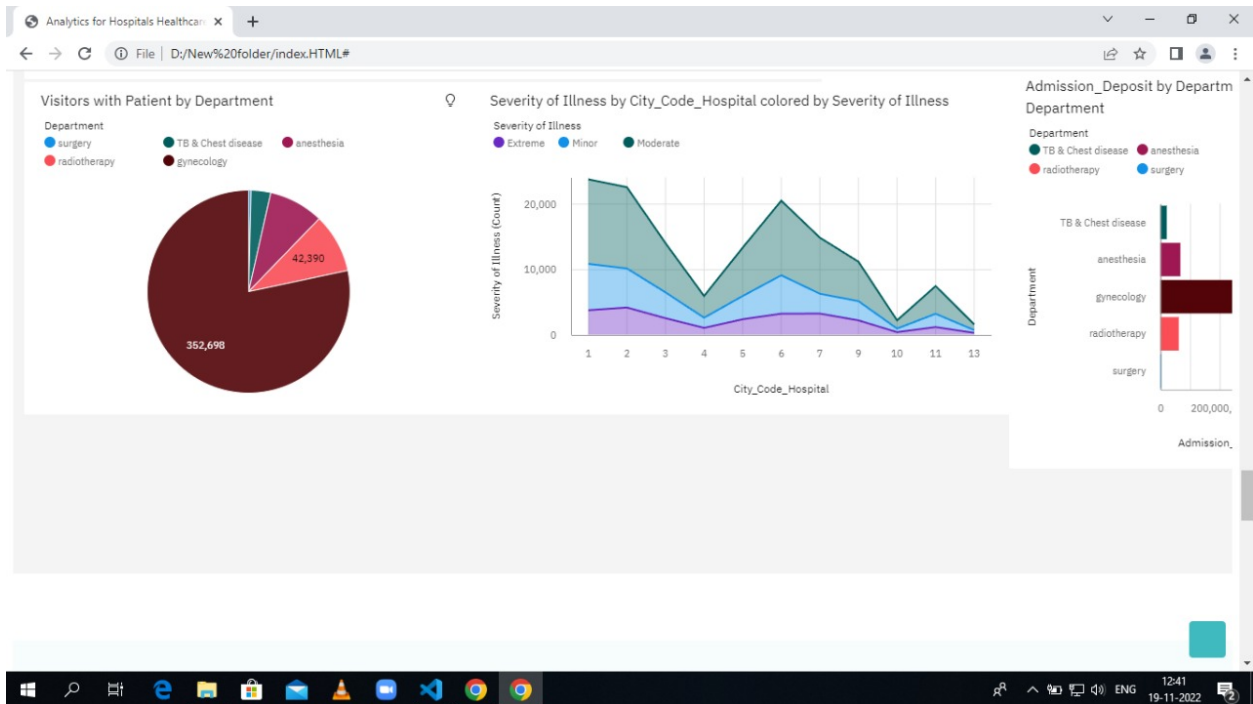

"Structured format incorporating elements of background information, medical history, physical examination, specimens obtained, treatment provided and opinion is suggested."
